"Customer Security"

November 5, 2015

AEON Delight Vietnam ("ADV") offers Customer Security services to provide information about the store and assistance to customers.

Besides store guidance and services such as carrying large packages for customers and accompanying them on the escalator, the role of Customer Security also includes protecting the security and comfort of the facility, together with the other staff.

In order to offer these fine tuned services, the security staff receives up to four hours of training every month. They are striving every day to offer better services to customers.
