

## **EFFECTIVE BUILDING MANAGEMENT WITH THE FACILITY MANAGEMENT**

August 9, 2017

Facility Management is included all the related services together as equipment management of office buildings, cleaning, security, landscaping ... into "one-stop".

Effective operational management will help to control costs, increase the lifespan and performance of a building in the long-term.

The consideration of how to cut down the cost of managing maintenance activities of buildings is also an important point. Facility Management is also cost management. It means having a direct relationship with the company's turnover and operations. A professional Facility Management Company is a company that can advise on the long-term business of a business such as evaluating Life cycle costs in 10-20 years in the level would be needed.
